

PRODUCT INFORMATION super concentrate glass window cleaner

AER-iS (Air-əs), n. 1. Environmentally friendly squeegee bucket and window wash solution. 2. Cost effective cleaning solution for year-round use 3. Easily measure and ready to use - just add water!

PRODUCT

(7 LBS - makes approx. 384 x 2.5 GAL applications)

AERiS™ glass window cleaner is specifically designed with low foaming surfactants to remove dirt, grime, salts and other damaging particles from glass. AERiS™ comes in convenient packaging that makes for easy measuring for squeegee buckets and other applications (up to 2.5 gallons) - just add water. Use AERiS with **FRIGO™** winter additive for a low cost freeze protection in a year-round cleaning solution.

AERiS Advantage

- Low cost windshield/squeegee cleaning solution
- Scientifically proven to reduce odor from bacteria growth in cleaning solution
- Use instead of costly “blue water” or other windshield cleaning solutions
- Easy to use - just add water! AERiS dissolves in seconds
- Environmentally safe, non methanol formulation and biodegradable
- Engineered for safety - non-toxic, safe for use around people, plants, and animals
- Year-round cleaning with FRIGO™ winter additive

Directions For Use:

Before using read MSDS for this product. MSDS is available at www.mycaf.com.

Application Directions:

1. Open AERiS container; fill lid to inside MARK.
2. Add AERiS to clean, empty squeegee bucket or container
3. Fill squeegee bucket or container with up to 2.5 gallons of water

This product is non-hazardous for storage and transport according to DOT regulations

FRIGO™ winter additive

FRIGO™ is the necessary complement to AERiS™ glass window cleaner to extend the effective temperature range beyond -20dF. FRIGO provides the system you need to match the varying freezing conditions you face. With just a few pumps of FRIGO you will extend your cleaning capabilities to be all year round.

In addition to providing products designed specifically for your retail fuel application, CAF is committed to helping you keep your location clean using cost effective methods. See how below how AERiS stacks up against the competition:

* Percentages represent potential saving by switching to AERiS.
 † All calculations done at recommended full dilution (MSRP pricing as of 6/1/08).

* Note: CFU/g is shown in logarithmic (i.e. 1 interval increase = 10x more bacteria)
 † Testing by Pace Analytical Services (Seattle, WA)
