

HOSE GUARDIAN

HOSE GUARDIAN WITH BUILT IN COMPRESSOR FREE OR COIN OPERATED AIR & WATER

Oil-less compressor with permanently lubricated bearings at connecting rods. Requires no oil. Continuous duty, thermally protected motor. Push button timer or coin meter activates oil-less air compressor with built-in Conrader valve which, allows compressor to run 100% unloaded when not inflating tires, that leads to 30% - 40% cooler operating temperatures. The hose line maintains pressure for instant air.

Cast aluminum top and base finished in heavy black powder coat paint. The cabinet houses a choice of one or two hose reels with air gauge and water bibb and oil-less compressor. Front door unlocks for access. Overall dimension is 16" x 16" x 44".

Automatic oil-less air compressor with hose reels enclosed in a cabinet for self service operation. Unit is ready for use after power is connected. Eliminates underground air lines.
